R&S®HL223 Log-Periodic Antenna

200 MHz to 1.3 GHz

Optimized for radiomonitoring and measurements

With its broadband characteristics and virtually frequency-independent radiation patterns, the R&S[®]HL223 log-periodic antenna covers a very wide frequency range.

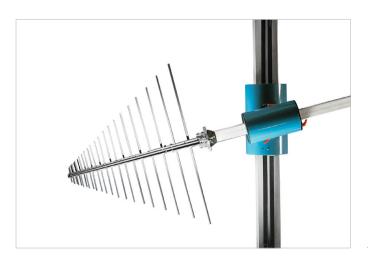

The sturdy construction makes the antenna suitable for stationary and mobile applications.

Each antenna is supplied with an individual calibration certificate so that it can be used for measurements and for monitoring and transmitting applications.

An accredited calibration of the free-space antenna factors is optionally available.
